ADDITIONAL DATA AND OUTCOMES

What other data or outcomes will your school use for continuous monitoring of your school-wide behavior management plan (e.g., academic data, faculty attendance, school surveys, training, ESE referrals, etc.)? The outcomes may also include various ways of analyzing school-wide behavioral data as outlined in the *School-wide Behavioral Data Guide* (e.g., referrals/suspensions by grade level, location, problem behavior, time of day, student, class, etc.).

We will use the RtI:B Database system. This new system, which replaces the SWIS, will enable us to analyze our students' behavior by grade level, teacher, location, behavioral infraction, and time of day. This informational data will allow us to conduct a comparative analysis in order to look at patterns of behavior that occur within particular locations, grade levels, time of day issues, etc., that occur from year to year. All discipline referrals are entered into FOCUS by the classroom teacher, administrators or the Behavior Coach.
